

**HANDY PACK**

**ECO-FRIENDLY**

Simple, Effective **Grease Management**

The 'Handy Pack' is a dissolvable sachet containing billions of grease hungry bacteria

To activate the 'Handy Pack' just add water!

Simply by placing in a bucket of warm water the 'Handy Pack' contents will come alive, creating a solution of grease hungry microbes which can then be poured straight into the drain line.

Once in the drainage system the microbes digest fat, oil and grease keeping lines free-flowing and controlling odours.

Grease Goblin Handy Packs contain specially selected naturally occurring fat degrading micro-organisms

**Grease Traps**

Ideal for kitchen gulleys and grease-traps the 'Handy Pack' is an easy to use and highly effective grease management product.

**Drains and Lines**

Regular treatment with 'Handy Pack' will keep lines grease free and control the level of grease within grease-traps.

## Simple, Effective Grease Management

### Directions for use

1. Place 1 'Handy Pack' in a bucket of lukewarm water (30 to 40°C).
2. Let stand for 10 to 15min to reactivate the bacteria.
3. Pour the solution into the main sink and floor drains or directly into the grease-trap.

### Using 'Handy Pack' for grease trap maintenance

1. Where possible empty grease trap prior to treatment for optimum results.
2. Add initial dosage directly into the trap using 1 x 'Handy Pack' per cubic metre.
3. Add weekly dosage to be added to lines upstream the day before the weekend based upon volumes shown below.

#### Maintenance dosage

-  Up to 250 meals /day      1 'Handy Pack' per week
-  250 and 500 meals /day      2 'Handy Pack' per week
-  500 meals + /day      3 'Handy Pack' per week

### Using 'Handy Pack' for general drain lines and floor gully maintenance

To avoid clogging or bad odours, mix 1 'Handy Pack' into a bucket of warm water and add to the drain every two weeks.
